公司简介 Company Introduction

Ningbo taiyue hardware co.,ltd. is a production-oriented enterprise integrating r&d, design, manufacturing and sales, specialized in producing flue pipes for gas boiler. Over the years, we have been absorbing the advanced production technology and production experience constantly, introducing advanced equipment, and now we have formed a perfect production management system. It makes our products have better quality and more competitive. Among them, EU style aluminum coaxial flue pipes are our characteristic product, won high reputation both at home and abroad.

We are proud to provide you with reliable and high quality products. We not only strive to provide high quality products, but also timely delivery, competitive prices and ongoing support.

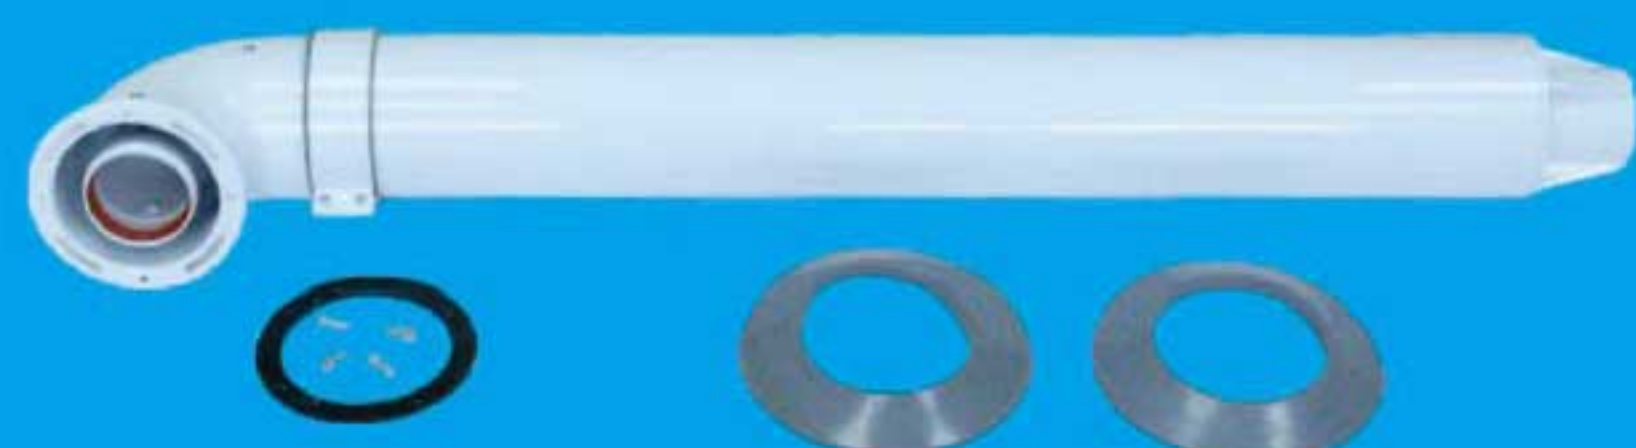

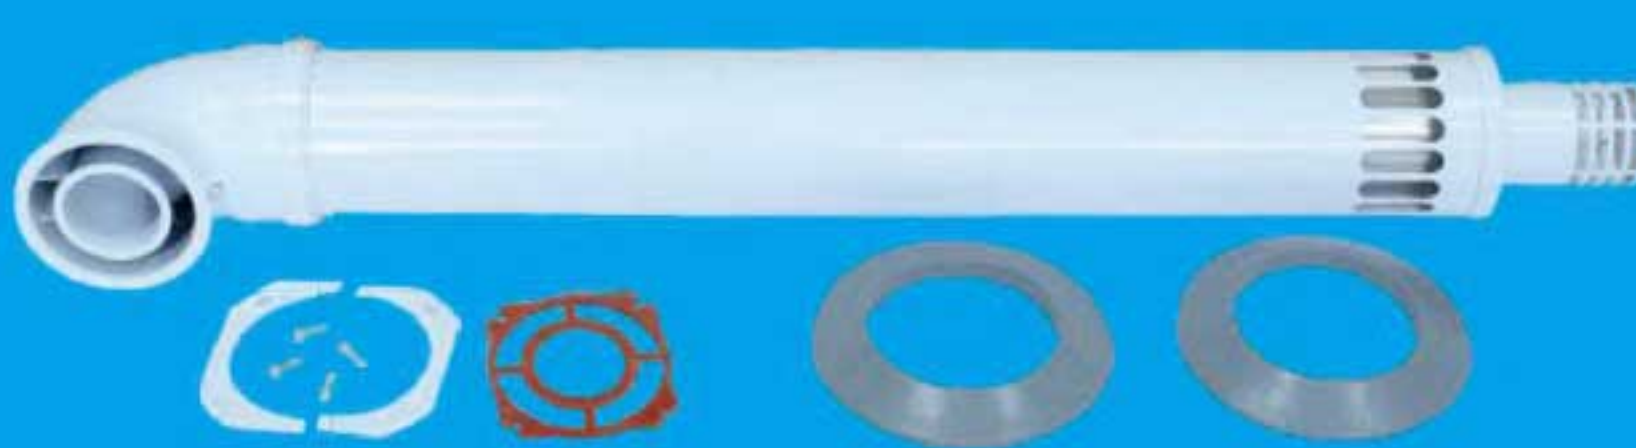

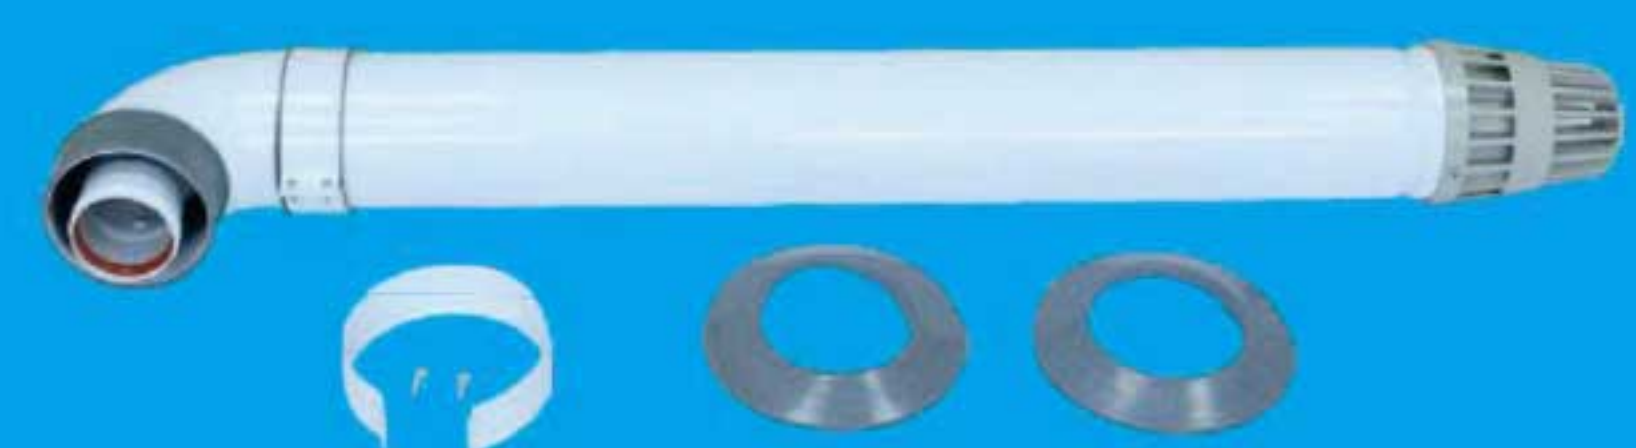

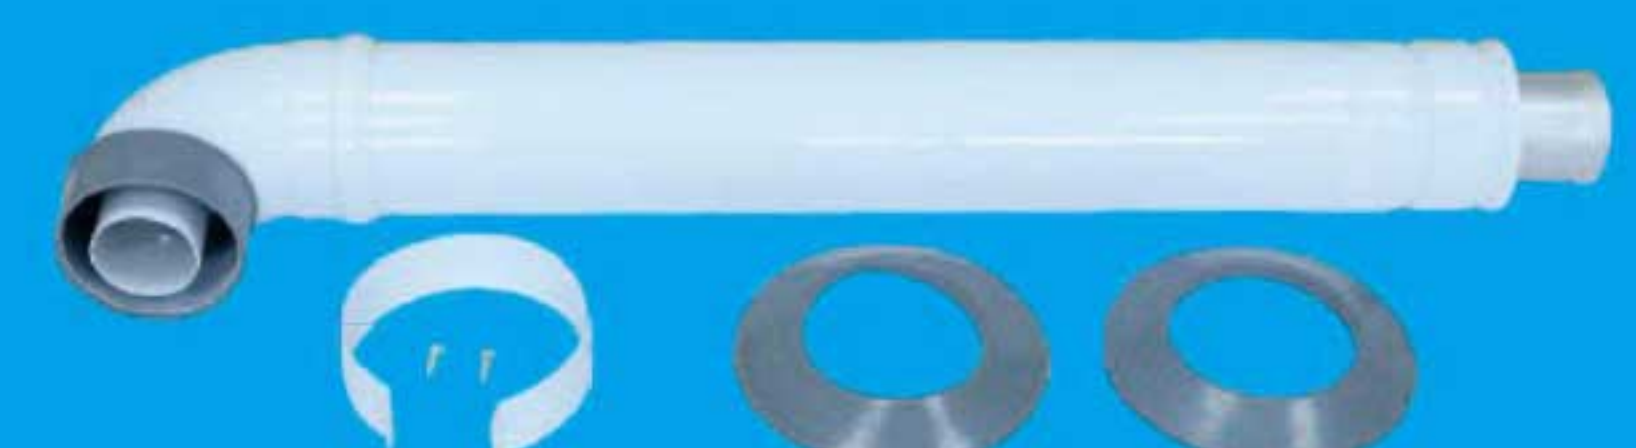

Thank you for your support, we look forward to becoming your long-term supplier for flue pipes. We will continue our efforts to offer you great products and services.
